Cytotechnology **21:** 289–290, 1996.

CONTENTS Volume 21 1996

Volume 21, No. 1

Abstracts

Special Section: IVth BELACT meeting, Namur, Belgium. Held on May 29, 1995 **1–10**

Research Papers

Normal rat intestinal cells IEC-18: characterization and transfection with immortalizing oncogenes
Olimpia Vincentini, Carmela Ciotta, Margherita Bignami, Annalaura Stammati & Flavia Zucco **11–19**

A new apparatus for studying the effect of hydrostatic pressure on cells in culture
L. Vergne, A. Meunier, M. Adolphe & L. Sedel **21–30**

Long-term culture of functional hepatocytes on chemically modified collagen gels
Naoki Shimbara, Ryoichi Awata, Makoto Takashina, Keiji Tanaka & Akira Ichihara **31–43**

Death rate in a small air-lift loop reactor of Vero cells grown on solid microcarriers and in macroporous microcarriers
D.E. Martens, E.A.A. Nollen, M. Hardevelt, C.A.M. van der Velden-de Groot, C.D. de Gooijer, E.C. Beuvery & J. Tramper **45–59**

Scale up cultivation of primary human umbilical vein endothelial cells on microcarriers from spinner vessels to bioreactor fermentation
Sevim Duvar, Johannes Müthing, Harald Mohr & Jürgen Lehmann **61–72**

The crystal violet nuclei staining technique leads to anomalous results in monitoring mammalian cell cultures
J.M. Berry, E. Huebner & M. Butler **73–80**

Cell suicide in starving hybridoma culture: survival-signal effect of some amino acids
František Franěk & Karonina Šrámková **81–89**

Volume 21, No. 2

Special Issue: A Focus on Australia

Guest Editor: C. HARBOUR

Introduction **91–94**

Evaluation of a simple protein free medium that supports high levels of monoclonal antibody production
Y.M. Qi, P.F. Greenfield & S. Reid **95–109**

Amino acid metabolism during batch culture of a murine hybridoma, AFP-27
C.P. Marquis, J.P. Barford & C. Harbour **111–120**

Carbohydrate and amino acid metabolism during batch culture of a human lymphoblastoid cell line, BTSN6
C.P. Marquis, J.P. Barford, C. Harbour & A. Fletcher 121–132

Biosynthesis of protein products by animal cells. Are growth and non-growth associated concepts valid or useful?
J.P. Barford, P.J. Phillips, C.P. Marquis & C. Harbour 133–148

Structured modelling of animal cells
C.S. Sanderson, P.J. Phillips & J.P. Barford 149–153

The kinetics of baculovirus adsorption to insect cells in suspension culture
J.F. Power, S. Reid, P.F. Greenfield & L.K. Nielsen 155–163

Enhanced secretory ability for the human factor VIII light chain produced in baculovirus-infected insect cells
E. Webb, J. Tkalcevic, S. Edwards, D. Hocking & I. Nisbet 165–170

Biological activity and metabolic clearance of recombinant human follicle stimulating hormone produced in Sp2/0 myeloma cells
C.K. Chin, P.R. Schofield, D.M. Robertson, P.P. Gray, W. Chotigeat & S.M. Mahler 171–182

Volume 21, No. 3

Development of human monoclonal antibodies: A review
T. Lindl 183–193

Culture of cells from tissues of adult and larval sea lamprey
C. Ma, & P. Collodi 195–203

Production of recombinant h-AT III with mammalian cell cultures using capillary electrophoresis for product monitoring
R. Freitag, O.-W. Reif, R. Weidemann & G. Kretzmer 205–215

Strategies for maximizing metallothionein promoter regulated recombinant protein production in mammalian cell cultures
E. Jervis, D.G. Kilburn 217–223

Improved protocols for the isolation and *in-situ* cryopreservation of cell colonies
J.-H. Küpper & M. Müller 225–229

Rapid authentication of animal cell lines using pyrolysis mass spectrometry and auto-associative artificial neural networks
R. Goodacre, D.J. Rischert, P.M. Evans & D.B. Kell 231–241

Quantitative comparison of rat hepatocyte functions in two improved culture systems with or without rat liver epithelial cell line
Y. Sakai, K. Ichikawa, A. Sakoda & M. Suzuki 243–252

Mammalian artificial chromosomes: A review
V. Sgaramella & S. Eridani 253–261

Hybridomas in a bioreactor cascade: modeling and determination of growth and death kinetics
W.A.M. Bakker, T. Schäfer, H.H. Beeftink, J. Tramper & C.D. De Gooijer 263–277

Processing of mutated human proinsulin to mature insulin in the non-endocrine cell line, CHO
S.M.N. Hunt, A.S. Tait, P.P. Gray & M.J. Sleigh 279–288

Volume contents 289–290

Author index 291
